Inquisitive and enthusiastic computer science student with strong foundation in math and programming logic. Highly interested in leveraging my skills in data science and machine learning fields.

EXPERIENCE

Software Engineering Intern

Pārv.ai

- 📅 June 2020 – Present 📍 Redmond, WA
- Pārv.ai is an AI-based educational platform interacting with various MOOC providers including Udemy and edX (on Azure Marketplace)
 - Developing web content using Node.js, React.js, Bootstrap, HTML, CSS, Azure SQL and Azure Web Sites
 - Enabling single sign-on with Google, Facebook & Azure Active Directory

CodeLabs Intern

CodeDay

- 📅 July 2020 – August 2020 📍 Remote
- Built a resume classification platform using Node.js, Express.js, Keras and TensorFlow for Python based on potential matching job categories
 - Implemented data processing pipeline in TensorFlow using Natural Language Toolkit (NLTK) and regular expression filtration techniques
 - Used tokenization and padded sequencing to encode resume data
 - Developed a CNN architecture to generate probability distributions for resume category classifications
 - Deployed the data processing pipeline and neural network on the web server to allow users to classify their resumes

Software Engineering Intern

Tata Consultancy Services

- 📅 August 2019 – September 2019 📍 Bellevue, WA
- **Project:** Meetings Monitor
 - Developed a .NET Core cross platform application with C# for a Raspberry Pi 4 to snapshot a conference room at regular intervals
 - Leveraged Azure Cognitive Services for human detection and facial recognition analysis on conference room snapshots
 - Used Azure Table Storage and Blob Storage for time-stamped storage of snapshots and analysis results
 - Implemented offline human detection with OpenCV HaarCascade classifiers to optimize API calls, reducing application cost by 90%

PROJECTS

ReadAct

📅 October 2020

- A Chrome extension that analyzes political bias and provides information about candidates and measures referenced in articles read by the user
- Leveraged the Bipartisan Press and WeVote APIs for conducting bias analysis and political information retrieval
- Leveraged the Azure Text Analytics API for entity/key phrase extraction and D3.js & Bootstrap for the frontend design

SpotiViz

📅 July 2020 – Present

- A web application for users to visualize their Spotify listening data
- Leveraging Python, Flask & the Spotify Web API for user authentication and data collection, and Bootstrap & D3.js for data visualization
- Project in development can be viewed at spotivizual.herokuapp.com

EDUCATION

B.S. in Computer Science

University of Washington, Seattle

- 📅 September 2018 – June 2021
- Combined B.S./M.S. program in Computer Science (**M.S. graduation in June 2022**)
 - **GPA:** 3.98/4.00
 - **Data Science option** in B.S.
 - Minor in Mathematics for B.S.
 - Microsoft Endowed Scholarship (2019-20)
 - Su Family Endowed Scholarship (2020-21)
 - **Prior Relevant Coursework:**
 - Systems Programming
 - Data Management
 - Data Structures and Parallelism
 - Software Design and Implementation
 - The Hardware-Software Interface
 - Discrete Mathematics and Probability
 - Linear Algebra and Analysis
 - Scientific Computing
 - Differential Equations
 - Statics, Kinematics and Dynamics
 - **Current Relevant Coursework (Fall 2020):**
 - Machine Learning (Graduate Course)
 - Data Visualization

SKILLS

Languages

Python Java C++ C# C
JavaScript MATLAB

Databases

SQL Azure SQL Firebase SQLite
Cypher neo4j SQL++

Data Science & Visualization

TensorFlow Keras scikit-learn
OpenCV Azure Cognitive Services
Google Cloud Platform D3.js NLTK
Matplotlib Seaborn Tableau

Web Development

HTML CSS React.js Express.js
Node.js Flask Bootstrap jQuery
Chrome APIs Jinja Axios Jade
